welcome to evonicfires

evonicfires is an award-winning brand of CK Fires Ltd, situated just outside Stratford-upon-Avon, we manufacture a range of British built electric fires and are considered as one of the most technically advanced manufacturers in the world, with optional controllers such as e-touch and a fully integrated APP available to download on both

This guide is designed to aid in the installation and continued performance of this product. This product conforms with all health, safety, and environmental protection standards as indicated by a CE mark. For optimum performance this product requires a well insulated location or occasional use.

IMPORTANT INSTRUCTIONS:

When using electrical appliances, basic precautions should always be followed to reduce the risk of fire, electric shock, and injury to persons, including the following:

- ① Read all instructions before using this electric fireplace.
- ② This fireplace is hot when in use. To avoid burns, do not let bare skin touch hot surfaces. The trim around the heater outlet becomes hot during heater operation. DANGER: High temperatures may be generated under certain abnormal conditions. Do not partially or fully cover or obstruct the front of this heater.
- ③ Extreme caution is necessary when any heater is used by or near children or people of reduced mobility and whenever the unit is left operating and unattended.
- ④ Young children should be supervised to ensure that they do not play with the appliance.
- ⑤ The appliance is not intended for use by young children or infirmed persons without supervision.
- ⑥ In the event of a malfunction, disconnect power at the service panel and have the unit inspected by a reputable electrician before reusing.
- ⑦ If the supply cord is damaged, it must be replaced by the manufacturer, or its service agent, or a qualified person in order to avoid a hazard.
- ⑧ Do not use outdoors.
- ⑨ Never locate fireplace where it may fall into a bathtub or other water container.
- ⑩ To disconnect the fireplace, turn the controls off, and turn off power to heater circuit at main disconnect panel.
- ⑪ Do not run the cord under carpeting. Do not cover cord with throw rugs, runners, or the like. Arrange cord away from traffic area and where it will not be tripped over.
- ⑫ Do not locate the heater immediately below a fixed socket-outlet.

⑬ Do not insert or allow foreign objects to enter any ventilation or exhaust opening as this may cause an electric shock or fire, or damage to the heater.

⑭ To prevent a possible fire, do not block air intakes or exhaust in any manner.

⑮ All electrical heaters have hot and arcing or sparking parts inside. Do not use in areas where gasoline, paint, or flammable liquids are used or stored.

⑯ Use this fireplace only as described in this manual. Any other use not recommended by the manufacturer may cause fire, electric shock or injury to persons.

⑰ Do not change the plug in any way. Always plug heaters directly into a wall outlet/receptacle. Never use with an extension cord or relocatable power tap (outlet/power strip).

⑱ Do not burn wood or other materials in the electric fireplace.

⑲ Do not strike the fireplace glass.

⑳ Always use a certified electrician should new circuits or outlets be required.

㉑ Always use properly grounded, fused and polarized outlets.

㉒ Disconnect all power supply before performing any cleaning, maintenance or relocation of the unit.

㉓ When transporting or storing the unit and cord, keep in a dry place, free from excessive vibration and store so as to avoid damage.

NOTE: Changes or modifications not expressly approved by the party responsible for compliance could void user's authority to operate the equipment.

INSTALLATION REQUIREMENTS:

Please read these instructions before installation or use and keep this booklet handy for future reference.

All Evonic fires products meet the requirements of the EC Directives.

These directives have been met by compliance with the following standards:

EU 2011-65/EU 2015/863 Restriction of Hazardous Substances

EN 55014-1:2006 + A2:2011 Electromagnetic compatibility.

EN 55014-2:2015 Electromagnetic compatibility.

EN 61000-3-2:2014 Electromagnetic compatibility (EMC). Limits. Limits for harmonic current emissions

EN 61000-3-3:2013 Electromagnetic compatibility (EMC). Limits. Limitation of voltage changes, voltage fluctuations and flicker

EN 60335-1:2012 + A1:2014

EN 60335-2-30:2009+A11:2012

Safety:

This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision

The instructions shall state that the heater must not be located immediately below a socket outlet.

WARNING: in order to avoid overheating, do not cover the heater.

Children of less than 3 years should be kept away unless continuously supervised

Children aged from 3 years and less than 8 years shall only switch on/off the appliance provided that it has been placed or installed in its intended normal operating position and they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children aged from 3 years and less than 8 years shall not plug in, regulate and clean the appliance or perform user maintenance.

CAUTION: Some parts of this product can become very hot and cause burns. Particular attention has to be given where children and vulnerable people are present

CAUTION: In order to avoid a hazard due to inadvertent resetting of the thermal cut-out, this appliance must not be supplied through an external switching device, such as a timer, or connected to a circuit that is regularly switched on and off by the utility

CAUTION: The LED light system shall be replaced by electrically competent personnel only (LP – These cannot be user replaceable since they will allow access to live parts)

General Warnings:

Never leave children unsupervised with an unguarded heater.

Never obstruct or cover the heater outlet.

Never install or use this product where it may come in contact with water i.e. a bathroom or wet room.

Never use aerosols or steam cleaners near this product.

Never route the electric cable near the heater outlet.

Never route the electric cable under carpets or floor coverings.

Never install this product close to curtains or combustible materials.

Never Use the heater to dry clothes or other objects.

Never remove the fireplace surrounding without isolating the electric supply.

Important electrical safety:

This appliance must never be installed above or in front of a fixed electric socket.

The electrical socket must be easily accessible to isolate the supply during maintenance and cleaning.

This appliance is supplied with a two meter power lead, which has a 13Amp moulded three pin plug to connect to a standard 230/240V plug socket.

This appliance must always be earthed. If in any doubt consult a suitably competent person.

Replacement plug: (Please note that it will invalidate your warranty if the moulded plug is removed and connected to a fused spur by an unqualified person).

This appliance must only be connected to a 230/240 Volts AC 50Hz supply. Before connecting the fire, check that the supply voltage is the same as stated on the fire.

This appliance must only be used on a AC supply, fuse rating 13Amp.

The wires in the mains lead are coloured in accordance with a standard UK supply, these being:

GREEN/YELLOW – EARTH

BLUE – NEUTRAL

BROWN – LIVE

As the colours of the mains lead of this appliance may not match the coloured markings used to identify the terminals in a plug, please observe the following **(Fig:1)**.

- The green and yellow wire must be connected to the terminal in the plug which is marked with the letter **E** or Earth symbol.
- The blue wire must be connected to the terminal in the plug which is marked with the letter **N**.
- The brown wire must be connected to the terminal in the plug marked with the letter **L**.
- Replace fuses only with fuses of the correct size and rating.

Installation Method

This product is designed to be assembled into our E-mod installation units or an existing flue or suitable wall space.

Please seek advice from a professional, with reference to the structural integrity of the installation site.

If the product is to be installed into an open chimney or flue, it is important that the chimney/flue is blocked off to prevent any up/down draughts and falling debris which could restrict and alter the airflow to the product.

It is also important to ensure that the product has a minimum internal clearance directly above and below the product of 100mm, this is to ensure that the product can circulate the required airflow for the heater unit.

The product should never be sealed into an opening with the use of silicones or adhesives as this can also alter the airflow and hinder any further servicing of the product.

If being installed into an E-mod, it is important to follow the E-mod instructions prior to installing the fireplace. This is to ensure the fireplace is being fitted into the correct section of the E-mod.

The fireplace is also available in **GF3** or **GF4** models. You will need to identify which model you are installing to ensure successful fitting of the appliance.

1. In order to successfully install this appliance, you must first make sure the plaster kit is properly assembled onto the fire. This is to ensure the main body of the fire can rest suitably onto a ledge and hold the weight of the fire.

Fig 1 shows the location of both the side plaster kits and the front plaster kit.

Fig 1.

Fig 2 shows the fire fitted into an E-mod assembly. Identified are the plaster kit sides, and how they are used to support the body of the fire in place.

Fig 2.

Fig 3 indicates the top section of the plaster kit. Once the fire has been fitted into place, the top plaster kit is used to support the E-mod case that sits above the fire.

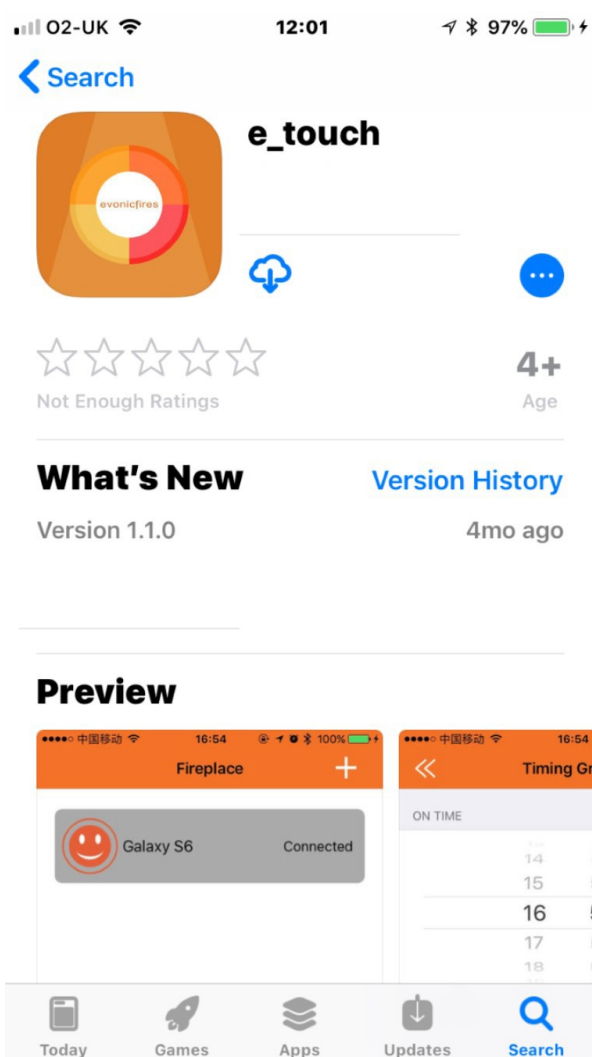

Fig 3.

E-Touch & App Template

The Appliance is operated using the E-Touch App Control.

The App Control can be used on either OS or Android operating systems.

To obtain the App please visit either the OS App Store Or Google Play and follow the on screen instructions.

Screen shot taken from Apple App Store.

Home Screen shot taken from E-Touch App

Glass Removal:

1. Remove the 2 screws located in the bottom glass retaining bar. Repeat this process on either side of the fire.

2. Remove the bottom glass retaining bar. Again, repeat this on both sides of the fire.

3. Remove the glass by pulling the second retaining bar away from the body of the fire. Ensure that the glass is supported at all times. A suction cup has been provided to aid with this step.

Please note: The suction cup is provided for support only, not to hold the full weight of the glass.

Please note: It is recommended that this step is carried out by 2 persons.

4. Once the front glass is removed successfully, slide the 4 side glass panels downward to remove.

Technical Specification

<u>MODEL</u>	<u>WIDTH</u>	<u>DEPTH</u>	<u>HEIGHT</u>
e1030DS	1002mm	500mm	556mm

<u>E-MOD SPEC</u>	<u>WIDTH</u>	<u>DEPTH</u>	<u>HEIGHT</u>
E-MOD 1	1050mm	305mm	420mm
E-MOD 2	1050mm	305mm	470mm

Troubleshooting Flow Chart:

Problem

Possible Cause

Solution

1)

Flames not working correctly

→ Ribbons are statically connected to glass.

→ Spray some anti-static spray beneath the tray.

→ Installation airflow restricted.

→ Check the correct aperture has been adhered to when installing— Recommended clearance is **100mm**.

→ Blower clogged.

→ Fan requires cleaning out.

→ Slow fan.

→ Fan requires cleaning out. If problem persists, replacement fan may be required.

2)

Heater blowing cold

→ Possible installation gaps/Chimney not adequately blocked off.

→ Chimney may not be fully blocked. Correct aperture has not been adhered to—**100mm**

→ Fan clogged.

→ Heater fan requires cleaning out

→ Faulty element.

→ Replace element

→ Slow fan.

→ Check fan placement. If problem persists replacement fan may be required.

Problem

Possible Cause

Solution

3) Noisy Heater	→	Fan unbalanced.	→	Adjust fan to stop catching on the case. If problem persists replacement fan unit maybe required.
	→	Fan catching on housing.	→	Adjust fan to stop catching on the case
	→	Fan clogged.	→	Fan requires cleaning out. If problem persists a replacement fan may be required.
	→	Fan has come loose.	→	Tighten fan cradle or screws holding fan onto fan cradle.

4) Noisy Heater	→	Fan unbalanced.	→	Adjust fan to stop catching on the case. If problem persists a replacement fan unit may be required.
	→	Fan catching on housing.	→	Adjust fan to stop catching on the case.
	→	Fan clogged.	→	Fan requires cleaning out. If problem persists a replacement fan may be required.
	→	Fan has come loose.	→	Tighten fan cradle or screws holding fan onto fan cradle.

Problem

Possible Cause

Solution

5) Fire not turning on.	→	Rocker switch has not been turned to the 'ON' position.	→	Double check switches are turned to the 'ON' position.
	→	Remote/App not paired.	→	Remote needs pairing. See separate pairing instructions for guide.
	→	Fuse blown.	→	Replace fuse.
	→	Unit not plugged in correctly.	→	Check to be sure the power lead is plugged in adequately.

6) No lights	→	Loose connection or disconnected wire.	→	Check all connections on LED's
	→	LED shorting out	→	Check location of short—Replace LED strip if necessary.
	→	LED blown	→	LED strip needs replacing.
	→	Blown driver on PCB	→	PCB needs replacing.

Problem	Possible Cause	Solution
<p>7) Heater coming on randomly</p>	<p>Timer has been accidentally set.</p>	<p>Double check timer settings.</p>
	<p>Thermostat faulty.</p>	<p>Replace PCB.</p>
<p>8) LED streaking</p>	<p>LED dropped down.</p>	<p>LED needs to be re-stuck into place.</p>
	<p>Log positioning.</p>	<p>Change log positioning to hide any direct view of LED strip.</p>
<p>9) Heater cutting out</p>	<p>Build up of hot air triggering heater cut-out unit.</p>	<p>Ensure the appliance has the required aperture for air to circulate and prevent build-up. Recommended 100mm</p>

Conditions of warranty:

If this appliance should prove to be defective due to faulty design, materials or workmanship within 12 months of purchase, the product will be repaired free of charge, subject to the following conditions:

The electric fire shall have been purchased and used solely within the UK and Ireland for domestic purposes and in accordance with the Users operating instructions.

It is the purchasers responsibility to prove that the unit is under warranty, e.g. receipt of purchase.

All warranties, will be invalidated if unauthorised repairs or modifications are made to the electric fire, or in case of accident, misuse or damage caused by improper installation, or to damage occurring during transit to or from the repairer and altered or missing serial numbers.

Any parts, which have been replaced under this warranty, shall become our property.

The company shall not be liable for any consequential loss or damage what so ever, arising from or in connection with this electric fire.

This Warranty does not apply to Heating elements, Bulbs or fuses.

'No fault found', service calls and installation errors are not covered under the manufacturers warranty and will result in a charge being made for the Call-Out by our appointed service engineer.

Registering product:

To register a product please visit: www.evonicfires.co.uk and complete the fields required under the **Register a Product Section**. By registering your appliance, an extra 12 months is added to your warranty
