

## Environmental Policy Statement

CK Fires is one of the UK's leading electric fire manufacturers. CK Fires fully recognises its responsibility to minimise any negative impact its products or business operations may have on the environment. CK Fires also recognises its responsibility to maximise on the positive impacts their products can have on the environment.

We are collaborating very closely with our key suppliers and our own staff to raise awareness and to implement initiatives that reflect our responsibilities. We will strive to comply with all relevant statutory environmental requirements and any voluntary requirements to which we have subscribed. We will ensure necessary resources are available to achieve our aims.

We are committed to the protection of the environment, the prevention of pollution and ensuring a commitment to our compliance obligations. We will set and review targets and objectives to ensure continual improvement of the environmental management system with the aim of enhancing our environmental performance.

Our policy demonstrates our commitment to:

- Eliminate, reduce, re-use and recycle materials wherever possible.
- Ensuring all suppliers demonstrate their commitment to environmental responsibilities through their working practices and that they support best environmental practice throughout their supply chain.
- Promoting open dialogue about our environmental commitment with our staff and customers, providing education and training to ensure that our policy is both understood and acted upon.
- Regularly review our environmental impact and take all practical measures to reduce our energy consumption.

The board of directors take full responsibility to communicate our policy to all who meet the business, as well as its implementation and the company's overall environmental performance and is freely available to our interested parties.

Andrew Cox

Managing Director
